

# Powder Soap Manufacturing

## Introduction

Previously not acknowledged as a main stream manufacturing business, but for the discerning person, looking for something out of the ordinary it offers a unique and highly profitable opportunity that affords the entrepreneur a simplistic business that generates a wonderful living.

### Benefits/Advantages:

Cash business (depending on market sector, this can be up to 100%).

- ☐ Simple manufacturing process (one manufacturing process).
- ☐ Easy administration (very few product lines and variations).
- ☐ High demand for product (everybody uses it).
- ☐ Easy to market.

### Related Available Machines:

Liquid Detergent Manufacturing Machine  
Bar Soap (Beauty & Laundry) Manufacturing

### Machine Attributes:

- ☐ The machine manufactures Hi-Foam and Low-Foam washing powders.
- ☐ These powders are compliant to Fully Automatic and Semi Automatic washing machines and can also be used for hand washing.
- ☐ The machine is capable of producing +/- 800 kg of soap powder per hour, that means a production of +/- 6 400kg of soap powder per day!
- ☐ Various formulations readily available.
- ☐ The carcass of the machine is epoxy coated.
- ☐ The electric of the machine comply with all industrial regulations. Three-phase electricity is required.
- ☐ The machine carries a twelve-month conditional warrantee.

### Machine Dimensions:

Length: 2,5 meters  
Width: 1,8 meters  
Height: 1,6 meters

### Raw Materials

- ☐ Foam Detergent Powder (Lower-end) ☐ Sodium Carbonate ☐ Sodium Sulphate ☐ STPP ☐ Salt
- ☐ Sodium Metasilicate ☐ Sulphonic Powder ☐ Sodium Perborate ☐ Water ☐ Foam Detergent Powder (High-end) ☐ Sodium Carbonate ☐ Sodium Sulphate ☐ STPP ☐ Sal ☐ Sodium Metasilicate ☐ Sulphonic Liquid ☐ Optical Brightener

### Marketing

Household brands of market leaders are becoming more expensive by the day; research done proves that there is a huge gap in the market.

Target Market: General Public, Wholesalers, Retailers, Hawkers, Laundromats and the huge export market due to the weak Rand.

### Cost of manufacture

With manufacturing costs of R 2,90 per kg, one is able to reap great financial rewards from this lucrative business!

Supplies to produce 1kg of lower-end washing powder would cost R2.90

Supplies to produce 1kg of High end washing powder would cost R4.04
